

This Data Sheet is prepared to describe specific programs, courses, methods, and training recommendations

Stormwater Erosion Control and Construction Site Runoff Inspector

Purpose

The erosion control and construction site runoff inspector course is designed to meet Phase II of the EPA NPDES permit regulations that require MS4s to inspect, identify and inform contractors of infractions to the rules for construction site runoff and erosion control.

Course

This two day course will allow students to participate in a construction site inspection. Course topics include

- ◆ methods of erosion control
- ◆ methods for containing and/or treating construction site runoff
- ◆ federal, state, and local regulations
- ◆ setting up the pre-construction conference
- ◆ methods of site inspection

Methods

Methods of instruction include lecture, discussions, and field activities.

Fees

Fees for this course are \$225 per student and include course materials, exam and certificate.

CEUs

Participants will earn 1.2 CEUs
